Group Project Member Evaluation Rubric

Please categorize **your performance and** those of the other members of your group, using the following descriptions. Emphasis should be on effort, teamsmanship, and overall contribution to the project, not on native ability. Note: "Taking over" a project and not allowing others to contribute is poor teamsmanship, and should be downgraded accordingly.

Exceptional(X): I have never seen anyone put this much time and effort into a project, and never expect to again. They really went overboard on this project, and must have no other life and/or they are certain to fail all their other courses this semester. Unbelievable.

Excellent(E): This person consistently went above and beyond the call of duty, delivering a sustained and outstanding contribution to team effort. This person was exceptionally supportive of other team members and was always ready to help out the rest of the team.

Very Good(VG): This person worked very hard on the project and delivered above average effort and contribution. This person was very supportive of the other members of the team.

Good(G): This person was a good solid team member, performing their fair share of the work willingly and was supportive of the other team members.

Fair(F): This person showed up and did their work, but was not as helpful or as useful as they could have been. They contributed some good material but their performance was patchy and/or they were difficult to work with.

Poor(P): This person put in a feeble effort. (S)he did not do his/her fair share of the work, missed meetings, and was not supportive of other team members. Some attempt was made, but their contribution was very weak due to poor skills, unsatisfactory attendance or other factors.

Superficial(S): Poor attendance and/or participation with virtually no contribution.

Zero(Z): This person did not do anything, and is trying to get a free ride. Attendance virtually zero and/or played no effective part in team effort.

Please provide comments regarding any evaluation less than "Fair"
