# CS 440 Meeting Minutes

Group_____26_____ Date:  _9/7 and 9/10_____ Time:  7pm (9/7) 2pm (9/10)_____
Duration:   _34 minutes (9/7) 70 minutes (9/10)_

Present, on time: Kenan Alghythee, Harry Tan, Robert Malone, Youngsang Aum

Present, not on time: none

Absent: none

---

Synopsis: Meeting 1 – 9/7/2022 – Robert set up the meeting through Discord and each group member discussed what coding projects from previous semester we would prefer. Robert was the only one with a solid preference and so the group decided on the Fitness and Nutrition Buddy project. Younsang later emailed the professor with our preference to receive the documentation and begin planning our first scenario.

Meeting 2 – 9/10/2022 – This meeting was to establish our plan for the first release and begin dividing up the work for each sprint of the release. Robert provided the shared document through Google Drive for us to fill out and submit. Everyone collaboratively worked on filling out the scenario document, adding diagrams and providing potential tools we could use, all while mapping out what we planned on accomplishing each sprint.

Recent Individual Accomplishments:

Robert – initial research into possible databases and APIs for use in the project
Kenan – explored options for databases we could use for hosting the application

Current Individual Activities:

Youngsang – write up the Meeting Minutes
Kenan & Harry – clean up diagrams for the GUI and use case using Figma
Robert – clean up the scenario documentation

Individual Action Items:

Youngsang – set up Jira for use

Robert & Harry – explore more API options and get an understanding of Google Maps API

Kenan – set up FireBase for use in hosting and testing our application
